Subject: RE: Enormous Differences between USGS and EPA on Pavillion

Here's our statement on this:

EPA has released new monitoring data as part of the agency's ongoing analysis of ground water quality in the Pavillion, Wyoming area. These data were collected in collaboration with the United States Geological Survey (USGS), which conducted its own sampling at one of the wells. USGS data were released earlier. EPA's new data and the USGS data are generally consistent with the monitoring data included in EPA's December 2011 Draft Report on Pavillion Area Ground Water Investigation. The new EPA data, along with EPA's draft report and USGS data, will be submitted to an independent expert peer review panel. EPA is also taking public comment on the data and will be extending the comment period to January 15, 2013 to give stakeholders sufficient time to consider all data related to the Pavillion, Wyoming groundwater investigation.

Alisha,

Would it be possible to speak to an EPA subject matter expert on the latest release of data from the Pavillion, Wyoming monitoring wells?

Also, I have never received a reply from EPA concerning my questions concerning problems with monitoring well number 2 in Pavillion and would appreciate it if I could receive a response to these inquiries.

I can be contacted by phone at 713-658-3229 or by replying to this email.

Thanks for your prompt response to this inquiry. I look forward to hearing back from you soon.
